Technical Description and Operating Instructions

Proper use
Only use the speakers as described in these operating instructions. Any other use will be deemed as not in accordance with the instructions and may lead to damage of property or even persons. The manufacturer accepts no liability for damage caused by use not in accordance with the instructions. The speakers are intended for private use.

Notice
Before operating the speakers, please read the safety notes and operating instructions carefully. This is the only way to use all functions safely and reliably. Keep the operating instructions safe and pass them on to anyone who may own the unit after you.

Original packaging
If you wish to exercise your eight-week right of return, we ask that you be absolutely sure to hold onto the packaging. We can only accept the return of a device WITH THE ORIGINAL PACKAGING. Empty boxes are not available!

Complaints
In case of a complaint we implicitly need your invoice number and the serial or lot number for processing. The serial number can be found on the back side of the device.

Many thanks for your support!

This product conforms with Council of the European Union guidelines 2004/108/EC and 2006/95/EC.
Safety notes

Caution icons
You will find the following caution icons in these instructions:

- **Danger**
  - **High risk!** Failure to observe the warning may result in severe personal injury or death.
  - **Moderate risk!** Failure to observe the warning may result in property damage.
  - **Minor risk!** Points which should be observed when handling the unit.

- **Attention**
  - **Fire hazard!** Improper use may lead to damage or fire.
  - **Danger to children!** Children can become trapped in the packing film when playing and suffocate.
  - **Danger to hearing** Loud noise may lead to hearing loss. Particularly when the subwoofer has been set to maximum volume and the unit is activated, very high noise pressure may suddenly be produced. This may have psychological consequences and also cause physical injury. Children and pets are particularly at risk.
  - **Danger of injury/damage!** Incorrect location may result in damage.

**Product contents**

1. 2 x column speaker L 430 FR
2. 2 x base plate
3. 8 x screw

**Check to be sure**
Check that all items have been delivered and that nothing is damaged. If the delivery is incomplete or you find damage sustained in transit, do not operate the device; instead contact our service department.
Mounting the base plate

The base plate with spikes ensures a safe position of the speaker and it minimises vibrations. You need a hexagon screw driver M4 (2.5 mm) for assembly.

1. Lay the column speaker ① carefully with the back side on a soft, padded base (e.g. on the polystyrene pads from the packaging).
2. Place the base plate ② carefully on the speaker bottom and screw tighten it with four screws ③.

Setup and connection

Setup

Note

Our website contains comprehensive notes for correct setup.

- Select a stable, level base.
- Make sure that the environment is clean and free from dust.
- Avoid placing the unit close to sources of heat or in direct sunlight.
- Arrange the connector cables so that they do not pose a trip hazard.
- Do not place any heavy objects on the cables or the speakers.
- Make sure that the speaker has a stable position to prevent vibrations.

Connecting

Danger

Danger of injury/damage!

Arrange the cables so that they do not pose a trip hazard.

- Pull the power plug of your AV receiver or multi-channel active subwoofer out of the socket.
- Lay the speaker cables from your AV receiver or multi-channel active subwoofer to each speaker. These cables should be high-quality double-wire speaker cable with marked strands. The cross section should amount to 2.5 mm².
- A connector comprising two terminals is located on the back side of each speaker, to which you have to connect the speaker cables.
- The terminal clips are each marked red (+) and black (-).

Make sure the polarity is correct!

Connect the like coloured terminals. Otherwise the sound quality will suffer.

The speaker connections of your AV receiver or multi-channel active subwoofer should be marked similarly. The strands of the speaker cables are marked with different colours or shapes.

1. Split the single wire down to approx. 30 mm on both ends and strip approx. 10 mm of insulation off of each cord.
2. Twist the stripped single wire ends together so that no wire protrudes. Tin coating is not necessary.
3. Turn the connector terminal counterclockwise until loose. Run the stripped cable end into the now visible hole. Close the terminal by turning it clockwise. The cable has now been clamped in place.
4. Connect the cables to the other speaker in the same way.
5. Connect the speaker cables to your AV receiver or multi-channel active subwoofer. The operating instructions of the appliance should contain notes on this.

Crossover frequency

The ideal separation frequency on the AV preamplifier/receiver or Teufel DecoderStation for the column speaker L 430 FR is 120 Hz.
Cleaning and care

Clean the speaker regularly with a soft, damp microfibre cloth. Please be absolutely sure to observe the following notes in the process:
- If possible, only use plain water without any additives. In case of stubborn marks, a mild soap solution may be used.
- Make sure that no liquid penetrates the unit.

**Attention Risk of damage!**
Using the wrong cleaning materials may damage the delicate surface of the case.
If possible, only use plain water without any additives. In case of stubborn marks, a mild soap solution may be used.
In no circumstances should caustic cleaning products, white spirit, thinners, petrol or similar be used for cleaning.

Troubleshooting

The following notes and further detailed information on our website should help you to rectify malfunctions. If this does not lead to success, please contact our hotline 00800 - 200 300 40 (free of charge). Please also observe the warranty notes.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Playback is noisy.</td>
<td>In general, the speaker is very low-noise. In most cases, the speaker system with exceptional resolution in the high range area can expose the poor quality of a signal source (e.g. from MP3 files).</td>
<td>Ensure that the source is sending a clear signal.</td>
</tr>
<tr>
<td>The sound seems dull.</td>
<td>The speakers have been connected with the wrong poles.</td>
<td>Verify the correct connection of the cables for all speakers.</td>
</tr>
</tbody>
</table>

Protecting the environment

**Disposal of the unit**

Used units must not be disposed of with household waste.
If the unit is no longer operational, every consumer is required by law to dispose of used devices separately from household waste, e.g. at a collection point run by the communal authority borough. In this way it is ensured, that used devices are properly recycled and that negative consequences on the environment are avoided. For this reason, electrical equipment is labelled with the displayed symbol.
